CITY OF WINNIPEG CONSTRUCTION NOTICE

TO: Resident/Business on Corydon Avenue

RE: 2019-2023 Stafford/Taylor/Corydon Pavement Renewals – Tender 1 2020-2021

Please be advised that the reconstruction of sections of Corydon Avenue will begin in May 2020.

Corydon Avenue - Thurso Street to Stafford Street

Construction start: May 2020

Duration: Roadworks to be completed by October 2020

Impacted streets and intersections: Corydon Avenue from Stafford Street to Thurso Street

Corydon Avenue – Eastbound Lanes Waterloo Street to Oxford Street

Construction start: May 2020

Duration: Roadworks to be completed by September 2020

Impacted streets and intersections: Corydon Avenue Eastbound from Waterloo St to Oxford Street

The work in the two sections of Corydon Ave as listed above will involve the reconstruction of the existing roadways, sidewalks, private approaches, streetlights, traffic signal lights and some drainage infrastructure.

Within the two work zones, on-street parking will be removed, and traffic will be restricted to one lane in each direction and at times Corydon from Thurso St to Stafford St will be reduced to one lane in one direction. On eastbound Corydon Ave between Waterloo St and Oxford St, two-way traffic will be maintained on Corydon Ave in the westbound lanes. Side streets and public lanes south of Corydon in this section will be closed to through traffic but will be accessible from Fleet St.

On Corydon Ave between Thurso St and Stafford St the work will be completed in multiple stages which will require several traffic control configurations. Closure of side streets and approaches will be required at different times during construction; however, we will make every effort to minimize impacts to traffic and pedestrians. Closures of private approaches will be discussed with the affected business/resident prior to.

Pedestrian access to residences and businesses will be maintained throughout construction and Transit service will be maintained. Existing Transit stops may be temporarily relocated or closed on a case by case basis depending on current construction activities in the immediate vicinity.

Anyone with accessibility concerns, special access requirements or if you have any other questions regarding this construction, please contact the Public Works Department's consultant for the work, Derek Wiebe, C.E.T. with Stantec Consulting by phone at (204) 292-6415 or by email at Derek.Wiebe@Stantec.com.

We understand that now is a time of much uncertainty but want to assure you we are proceeding on the assumption that construction will continue. We will be using alternate means of communication to ensure that discussions which would have formerly took place in person still occur. If you anticipate being away from your business and/or mailbox for an extended period of time, please contact us with an alternative address, phone number, and email at which we can reach you leading up to and during construction. We appreciate your patience during construction and look forward to a completed project this fall.

Sincerely,

Scott Suderman, P.Eng
